"Nigeria's Progress in Achieving Population Stabilization," by Mrs. F.N. Abdulraheem, National Planning Commission.

"Population Stabilization: the Case for Pakistan," by Abdul Ghaffar Khan, Director General, Ministry of Population Welfare.

"People Beyond Numbers: the Road to Population Stabilization in the Philippines," by Tomas Osias, Lolito Tacardon and Luis Pedroso, Commission on Population.

"Uganda's Population Stabilisation Report," by Dr. Betty Kyaddondo, Head of Family Health Department, Population Secretariat.

"The Evolution of the population in Senegal," by Dr. Boubacar Samba Dankoko, Medical Public Health Specialist, Technical Adviser No 1 of the Minister of Health.

"Population Stabilization in Tanzania," by Grace Lusiola and Maurice Hiza, National Family Planning Coordinator for the Ministry of Health.

"Population Stabilization: Efforts and Challenges: Case of Yemen," by Mr. Abdul-Malik Sharafuddin, Director General of Planning and Resource Mobilization, Technical Secretariat of National Population Council.

"Zimbabwe Population Stabilisation Report," by Dr. Munyaradzi Murwira, Zimbabwe National Family Planning Council.

You can read these reports on our websites: www.gillespiefoundation.org and www.populationcommunication.com. We would be happy to send you hard copies.

We are editing, "Report on Population in Cameroon," by Florence Bopda, Division of Demographic Analysis and Migration, Ministry for the Economy of Planning and Regional Development. We have inquiries to the following individuals in Angola: Pedro Luis da Fonseca, Secretary of State for Planning and Territorial Development at the Ministry of Planning and Territorial Development, Luís Gomes Sambo, Minister of Health, Maria Filomena de Fátima Lobão Telo Delgado, Minister for the Promotion of Women and Dr. Camilo Ceitu, National Institute of Statistics; and in Niger: Kaffa Christelle Jacko, Minister of Population, Amadou Aïssata, Minister of Women's Promotion and the Protection of Children, Amadou Boubacar Cisse, Minister of Planning, Mano Aghali, Minister of Public Health, and Maman Sani Malam, Minister of Planning and Community Development to obtain country specific reports.

We will soon initiate reports from Mozambique, Burkina Faso and Cote d'Ivoire. Our mission is to contract reports in all countries with populations over 20 million and TFRs greater than 3. We update the reports every five years.

We have updated the population projection charts for Angola, Bangladesh, Burkina Faso, Cameroon, Cote d'Ivoire, Democratic Republic of Congo, Egypt, Ethiopia, Ghana, India, Indonesia, Kenya, Madagascar, Mozambique, Niger, Nigeria, Pakistan, the Philippines, Sudan

and Zimbabwe (also available on our websites). The charts begin in 1962 and go until 2015 using data from the World Bank, Populstat.info or the United Nations Population Division. She started with the year 1962 when the PRB published the first *Population and Vital Rates for 127 Countries*. She used the Spectrum program to run the assumptions from 2015 to 2065. Because the Spectrum population data differs from the PRB population estimates for 2015, we are attaching a chart with the discrepancies. Unfortunately the Spectrum program cannot be adjusted to reflect more accurate assumptions, but the projections change only slightly from what is dramatically revealed in the momentum of population growth during the next five decades. The projections are not predictions but definable realities based on TFR assumptions.
